

BICOM VENDING MACHINES

INNOVATION IN

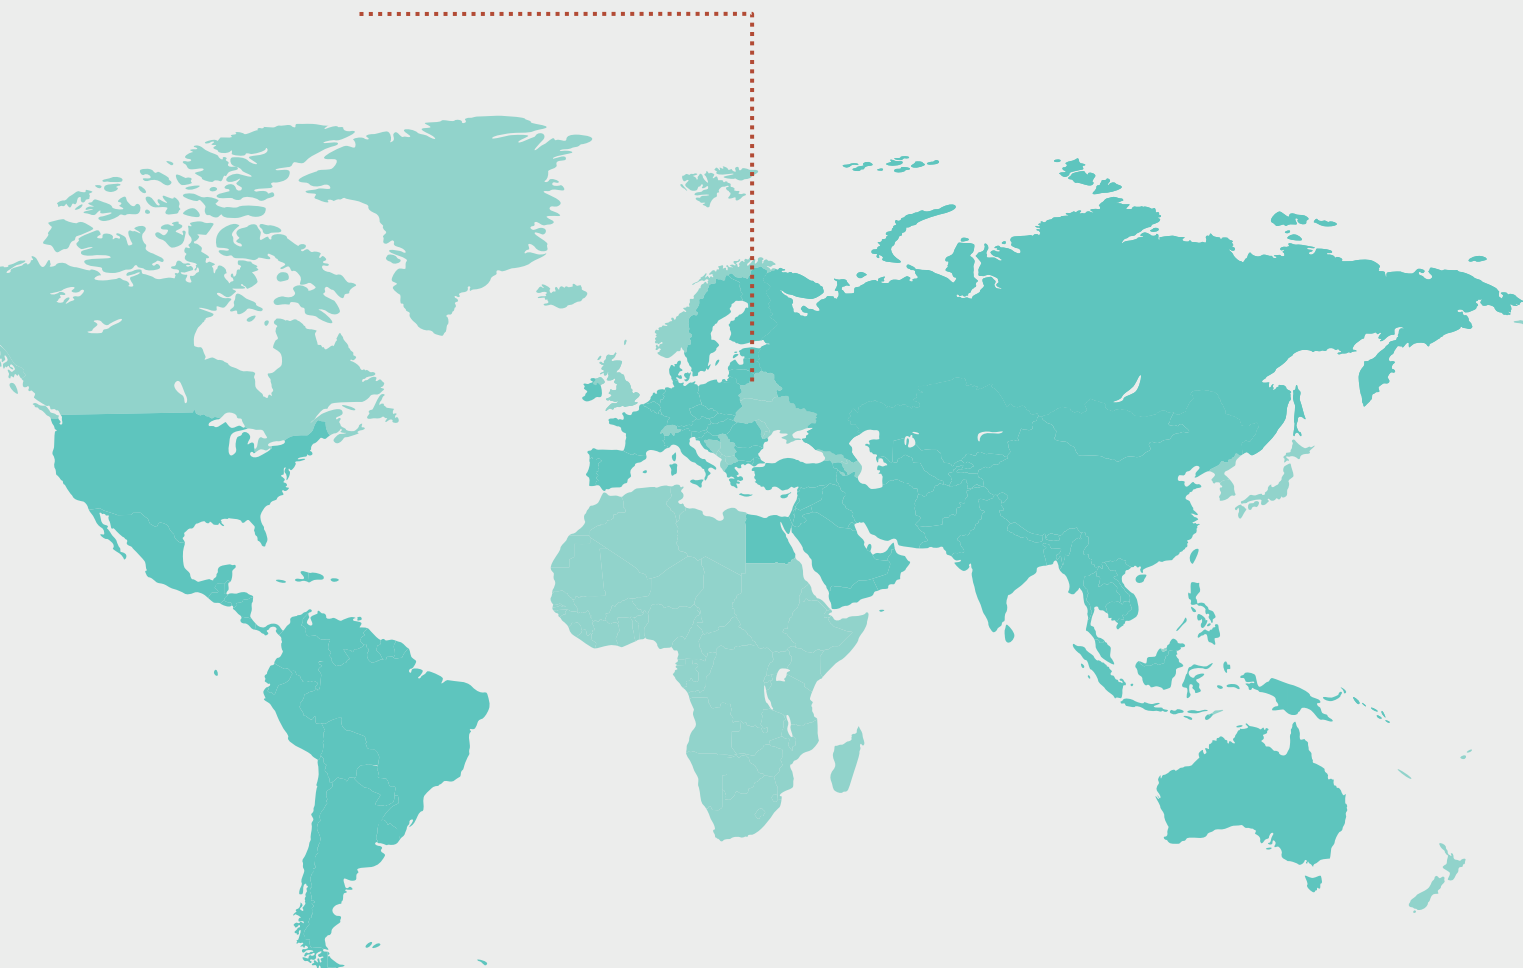

AUTOMATIC DISTRIBUTION

Bicom, a leading company in the **design and production of vending machines for hot and cold meals**, exports Italian technological innovation worldwide.

Thanks to our ongoing research into advanced technical solutions, we meet the needs of an ever-evolving food service industry.

BICOM IN THE WORLD

Bicom is present in **Europe, Asia, the Middle East, America and Australia.**

OUR VENDING MACHINES

Bicom vending machines provide an **innovative solution for automated catering**, ensuring:

ADAPTABILITY

Capable of managing **up to 100 different dishes simultaneously**, adapting to various food types of food and packaging.

REMOTE MONITORING

The **B-Cloud platform** enables **real-time tracking of sales, stock, and storage temperatures** via PC, tablet, or smartphone.

CUSTOM HEATING

Integrated microwave ovens bring meals to the ideal temperature without altering their organoleptic properties.

USER-FRIENDLY INTERFACE

Interactive touchscreens provide product information and display **promotional content** while the meal is being prepared.

BICOM CLOUD

INTELLIGENT CONTROL

AND MANAGEMENT

B-Cloud is Bicom's **advanced management platform**, designed to simplify vending machine control and enhance operational efficiency. Through real time data collection and analysis, B-Cloud **enables continuous and detailed monitoring**.

PRICE MANAGER

Set **different prices for the same item** on each machine.

SALES MONITORING

Track **sales in real-time** by item, day, week, or month.

STOCK MANAGEMENT

Check food quantities in machines in real time.

TECHNICAL INFORMATION

Detect **alerts** and gather technical data **for quick intervention**.

COMMUNICATION & ADVERTISING

Manage and upload **promotional videos** to vending machines, visible during sales operations and in screensaver mode.
